

IF YOU'RE READING THIS

THERE'S A GOOD CHANCE

That you've been thinking about freelancing
but don't really know where to begin.

First of all, welcome!

My name is Hammad, and I've been working as a freelancer for more than five years. And like you, I didn't know where to start either.

I spent hours watching random YouTube videos, trying different methods, making countless mistakes, and figuring things out through trial and error.

Some things worked & many didn't!

There were projects I lost, opportunities I missed, and moments where I questioned “whether freelancing was even worth it”.

But every mistake taught me something valuable. Over the years, I discovered methods that actually work, shortcuts that save months of confusion, and practical approaches that most beginners don't hear about.

The surprising part? Very few people openly share these lessons.

Most content on youtube teaches what freelancing is. Hardly I have seen anyone teaching how beginners should actually begin.

That's exactly why we created the “First Paycheck Edition”.

Not to promise overnight success. But to give you the roadmap I wish someone had handed me when I was starting many years ago.

Throughout these six days, I'll share my real experience, common mistakes to avoid, and the methods that helped me build my freelancing journey over the past five years and my hope is simple.

That your journey becomes a little less confusing than mine was!

If this Edition helps even one student avoid months of uncertainty and take their first confident step toward earning online, it'll be worth every minute we've put into creating it. I genuinely look forward to meeting you inside the Studio.

See you there. ❤️
